Providence, RI 02906 | Phone: (678) 914-5561 | E-Mail: shadrack@brown.edu | shadrackannor.com

EXPERIENCE

- Brown Computer Science (SWRL), Research Assistant** Remote | March 2025 – Present
- Presented "How Long-Term Memory in ChatGPT Shapes and Reinforces Youth User Beliefs" at 2025 Brown Summer Research Symposium, identifying a gap in AI where chatbots reinforce echo chambers through sycophantic responses.
 - Conducted audit of ElliQ companion robot using personas informed by *A Taxonomy of Generative AI Risks from Empirical Data* (USENIX SOUPS 2025); presented at the Weinberg Center for Elder Justice.
 - Active member of the AI and Interpersonal Relationships (AIR) group; visiting researcher at NYU mLab (advised by Prof. Danny Huang) studying developmental effects of AI companion systems on users.
- Character Lab, CLIP Research Intern** Remote | May 2022 – May 2023
- Supported youth mental health research initiatives at nonprofit focused on evidence based wellbeing interventions
 - Served as a student ambassador, increased survey participation by 30%, and engaged in focus groups on mental health

PROJECTS

- Polarity Lab (polarity-lab.com), Co-Founder & CTO** Providence, RI | May 2025 – Present
- Granted by 1517 Fund to develop AI research lab building systems that model how users connect concepts through a shared cognitive mapping engine, returning behavioral data to users in a form they can see and control.
 - Co-invented 2 provisional patents: neuroanatomical knowledge graph construction with cognitive biometric authentication (24 claims) and Conversational Connectomics methods for cognitive fingerprinting (12 claims)
- Blueno(blueno.polarity-lab.com)**
- Built and shipped Blueno (blueno.polarity-lab.com), an anti-sycophantic reflection-capture system architected for a clinician-insight interface; React Native/Expo client over a Cloudflare Pages Functions, D1, and KV backend, with B2B clinician partnerships in active development
- WaxFeed(wax-feed.com)**
- Built full-stack social music platform ("Letterboxd for albums") using Next.js, TypeScript, Prisma, and PostgreSQL
 - Aggregated music journalism from 14+ publications into a unified in-app feed
 - Built personalized recommendation engine across 12M+ albums based on user ratings and behavioral patterns over trends
 - Developed interactive global radio feature with 27 city-based DJ streams and location-based discovery
- PolarityGPS(polaritygps.com)**
- Co-built PolarityGPS with a Brown Medical School co-founder as a public health response to technology-mediated disease ('AI psychosis', loneliness), reframing discovery as a tool to restore presence rather than maximize engagement.
 - Designed the product to counter mainstream map engagement dynamics: Instead of surfacing the most popular locations, PolarityGPS nudges users toward overlooked community spaces (music venues, causes, parks, cultural sites)
 - Built PolarityGPS as a city-as-game with 631 off-map locations across 5 RI counties; designed to generalize to new cities.
- A Very Distant Perspective(averydistantperspective.com)**
- Co-create A Very Distant Perspective (AVDP) interview podcast ; in talks with Ghana Football Association and RI Sports Commission for 2026 FIFA World Cup coverage
 - Designed experimental recording formats placing guests in unconventional environments (deserts, pottery studios, live instrumentation) to create the conditions for presence and surface more candid conversation.

LEADERSHIP & DEVELOPMENT

- WBRU 360, Creative Director** Providence, RI | September 2024 - February 2026
- Produced 360 Sound live DJ session series (8 sessions) filmed at RISD Museum, Providence Bridge, and Ottawa
 - Grew @WBRU360 Instagram to 2,000 followers, 68,565 views and 13,235 unique viewers in 90 days (629% viewer growth, 70% non-followers), the station's most measurable audience output since selling its FM signal
 - Organized community fundraiser during EBT outage, requiring food donations as event admission
 - Built internal tools to streamline operations: playlist manager, DJ set transcriber, and Spotify song ripper

EDUCATION

- Brown University, 4.0 GPA** Providence, RI | Expected Graduation - May 2027
- B.A.- Double Concentration - Computer Science & Religious Studies**
- Relevant Coursework & Certification:** Sociotechnical Approaches to AI & HCI, Socially Responsible Computing, Data Structures & Algorithms, Computing Foundations, Discrete Structures & Probability, Linear Algebra, Cryptographic Systems, Fundamentals of Computer Systems, CodePath Intermediate Technical Interview Course Certificate, Management Leadership for Tomorrow Fellow

TECHNICAL SKILLS

Programming Languages: Python, Rust, Java, JavaScript, C/C++, SQL, HTML/CSS, Swift, TypeScript,
Frameworks & Tools: Full Stack across Cloudflare, React, Expo, Next.js, FastAPI, PostgreSQL, Three.js, AWS (EC2, SES), Vercel, Git, Figma, Claude Code, Codex, Blender | Premiere Pro, After Effects, Photoshop
